

## SEVERE WEATHER BULLETIN #19

### FOR: TROPICAL STORM "ROLLY" (GONI)

#### TROPICAL CYCLONE: WARNING

ISSUED AT 11:00 PM, 01 November 2020

(Valid for broadcast until the next bulletin to be issued at 2 AM tomorrow)

#### "ROLLY" RAPIDLY WEAKENS INTO A TROPICAL STORM.

##### Track and intensity outlook:

On the forecast track, "ROLLY" is expected to exit the Philippine Area of Responsibility (PAR) on Tuesday morning. It is likely to remain as a tropical storm throughout the forecast period.

##### Hazards affecting land areas:

- **Rainfall:** Tonight through tomorrow morning, light to moderate with at times heavy rains due to "ROLLY" may be experienced over Ilocos Region, Cordillera Administrative Region, Cagayan Valley, and Central Luzon.
- **Strong winds:** Gale-force winds are still expected in areas under TCWS #2, and strong breeze to near gale conditions for areas under TCWS #1. Potential impacts of the wind conditions to structures and vegetation under each wind signal are detailed in the TCWS section of this bulletin. Elsewhere, strong breeze to near gale conditions due to the northeasterlies will be experienced over Batanes, Babuyan Islands, Ilocos Region, Cordillera Administrative Region, and the northern portion of mainland Cagayan.

##### Hazards affecting coastal waters:

- Rough to very rough seas (2.5 to 5.0 m) will prevail over the seaboards of Northern Luzon and Central Luzon, the western seaboards of Batangas, Occidental Mindoro including Burias Island, and Calamian Islands, and eastern seaboards of Quezon including Polillo Islands and Bicol Region. Sea travel is risky over these waters, especially for those using small seacrafts.
- Moderate to rough seas (1.2 to 2.5 m) will be experienced over the western seaboards of Palawan including Kalayaan Islands and the eastern seaboards of Visayas and Mindanao. Mariners of small seacrafts are advised to take precautionary measures when venturing out to sea. Inexperienced mariners should avoid navigating in these conditions.

<b>Location of eye/center</b>	At 10:00 PM today, the center of <b>Tropical Storm "ROLLY"</b> was estimated based on all available data at <b>150 km Northwest of Calapan City, Oriental Mindoro</b> or <b>90 km West Southwest of Sangley Pt., Cavite (14.3°N, 120.1°E)</b> .
