

SEVERE WEATHER BULLETIN #5

FOR: TROPICAL STORM "CRISING"

TROPICAL CYCLONE: WARNING

ISSUED AT 5:00 PM, 13 May 2021

(Valid for broadcast until the next bulletin to be issued at 8 PM today)

TROPICAL STORM "CRISING" MAINTAINS ITS STRENGTH AS IT MOVES CLOSER TOWARDS DAVAO ORIENTAL-SURIGAO DEL SUR AREA.

Hazards affecting land areas

Heavy Rainfall:

- Today until tomorrow afternoon, moderate to heavy rains may prevail over Caraga, Davao Region, Northern Mindanao, SOCCSKSARGEN, and Bangsamoro
- Under these conditions, flooding (including flash floods) and rain-induced landslides are possible during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps. Adjacent or nearby areas may also experience flooding in the absence of such rainfall occurrence due to surface runoff or swelling of river channels.
- PAGASA Regional Services Divisions may issue local thunderstorm/rainfall advisories and heavy rainfall warnings while the Hydrometeorology Division and River Basin Flood Forecasting and Warning Centers may issue General Flood Advisories and Basin Flood Bulletins as appropriate.

Severe Winds:

- Tropical Storm "CRISING" will bring gale-force winds in localities under Tropical Cyclone Wind Signal (TCWS) #2 and strong breeze to near gale conditions over the localities where Tropical Cyclone Wind Signal #1 is in effect, especially in the coastal and mountainous areas of these localities.

Hazards affecting coastal waters

- In the next 24 hours, under the influence of Tropical Storm "CRISING", moderate to rough seas will be experienced over the eastern seaboard of Mindanao (1.2 to 3.5 m). Mariners of small seacrafts are advised not to venture out over these waters. Inexperienced mariners of these vessels should avoid navigating in these conditions.

Track and Intensity Outlook

- On the forecast track, "CRISING" will move west-northwestward and is likely to make landfall over Davao Oriental-Surigao del Sur area between tonight and tomorrow morning. It is forecast to remain tropical storm prior to landfall. Tomorrow, "CRISING" is forecast to weaken into a tropical depression as it traverses the rugged landmass of Mindanao and will emerge over the Sulu Sea on Saturday (15 May) early morning.
- "CRISING" is forecast to weaken into a remnant low on Sunday (16 May) morning after it passed over Palawan.
