TROPICAL CYCLONE ADVISORY NO. 11

Typhoon NANMADOL

Issued at 11:00 AM, 16 September 2022

Valid for broadcast until the next advisory at 11:00 PM today

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- NANMADOL is forecast to move generally west northwestward today before turning northwestward to north northwestward for the rest of the remaining forecast. On the track forecast, it may enter the Philippine Area of Responsibility (PAR) region this afternoon. Once inside the PAR, the domestic name "JOSIE" will be assigned to this tropical cyclone. This tropical cyclone is also expected to exit the PAR region tonight or Saturday early morning.
- Further intensification is forecast to occur throughout the forecast period. NANMADOL may reach to super typhoon category within 24 hours.
- This typhoon is forecast to remain far from the Philippine landmass and not directly affect the weather condition in the country. However, the Southwest Monsoon enhanced by NANMADOL will bring rains over the western sections of Southern Luzon and Visayas in the next 24 hours. For more information, refer to the 24-Hour Public Weather Forecast issued at 4:00 AM today and Weather Advisory #3 issued at 11:00 AM today.
- The enhancement of the Southwest Monsoon may also bring gusty conditions reaching strong to gale-force strength (especially in coastal and mountainous/upland areas) over Visayas, MIMAROPA, Bicol Region, and the northern and western portions of Mindanao.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless an intermediate advisory or initial tropical cyclone bulletin is released, the next tropical cyclone advisory will be issued at 11:00 PM today.
