

SEVERE WEATHER BULLETIN #26-FINAL

FOR: TYPHOON "ULYSSES" (VAMCO)

TROPICAL CYCLONE: ALERT

ISSUED AT 11:00 AM, 13 November 2020

"ULYSSES" RE-INTENSIFIES INTO A TYPHOON AND IS NOW OUTSIDE THE PHILIPPINE AREA OF RESPONSIBILITY (PAR).

Hazards affecting land areas:

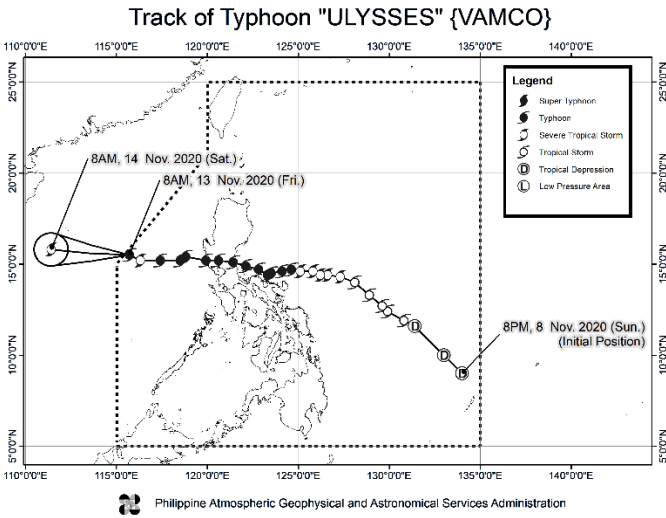

- **Strong winds:** "ULYSSES" and the surge of the Northeast Monsoon will continue bringing gusty conditions over Batanes, Babuyan Islands, Cordillera Administrative Region, Ilocos Region, Zambales, and Bataan.
- **Heavy rainfall:**
 - **Today, moderate to heavy rains** will still be experienced over Batanes and Babuyan Islands. **Light to moderate with at times heavy rains** may prevail over the rest of Cagayan Valley, Cordillera Administrative Region, Ilocos Norte, and Aurora
 - **Flooding (including flashfloods), rain-induced landslides, and sediment-laden streamflows (i.e. lahar) may occur during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards and/or those that received significant antecedent rainfall.** PAGASA Regional Services Divisions may issue local thunderstorm/rainfall advisories and heavy rainfall warnings while the Hydrometeorology Division and River Basin Flood Forecasting and Warning Centers may issue General Flood Advisories and Basin Flood Bulletins as appropriate.

Hazards affecting coastal waters:

- Within the next 24 hours, the combined effects of "ULYSSES" and the surge of the Northeast Monsoon will bring rough to very rough seas (2.5 to 5.5 m) over the seaboards of Batanes, Babuyan Islands, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, and Zambales, the northern seaboard of mainland Cagayan, and the western seaboards of Bataan, Batangas, Occidental Mindoro (including Lubang Island), and Palawan (including Calamian and Kalayaan Islands). Sea travel is risky for all types of seacrafts over these waters.
- Moderate to rough seas (2.0 to 3.5 m) will be experienced over the eastern seaboards of Luzon. Mariners of small seacrafts are advised to take precautionary measures when venturing out to sea. Inexperienced mariners should avoid navigating in these conditions

Track and intensity outlook:

- The center of the eye of "ULYSSES" left the PAR at 9:30 AM today. It is forecast to move generally westward or west-northwestward towards the central portion of Vietnam.
- "ULYSSES" re-intensified into a typhoon at 8:00 AM today. It is likely to maintain its strength in the next 12 hours, then gradual weakening is expected due to increasingly unfavorable conditions caused by the surge of the Northeast Monsoon.

Location of eye/center	At 10:00 AM today, the center of the eye of Typhoon "ULYSSES" was located based on all available data at 500 km West of Iba, Zambales (OUTSIDE PAR) (15.5°N, 115.3°E).	
Strength	Maximum sustained winds of 120 km/h near the center and gustiness of up to 150 km/h.	
Movement	Moving West Northwestward at 10 km/h.	
Forecast Positions	<ul style="list-style-type: none">• 24 Hour (Tomorrow morning): 955 km West of Dagupan City, Pangasinan (OUTSIDE PAR) (15.8°N, 111.4°E)	

NO TROPICAL CYCLONE WIND SIGNAL

With this development and unless re-entry occurs, this is the final warning for this weather disturbance.
