

TROPICAL CYCLONE ADVISORY NO. 3

Tropical Depression

Issued at 11:00 PM, 13 September 2022

Valid for broadcast until the next advisory at 11:00 AM tomorrow

THE TROPICAL DEPRESSION CONTINUES TO MAINTAIN STRENGTH WHILE MOVING EAST NORTHEASTWARD						
Location of Center (10:00 PM)						
The center of the Tropical Depression was estimated based on all available data at 1,865 km East of Extreme Northern Luzon (Outside the PAR) (22.4°N, 139.8°E)						
Intensity						
Maximum sustained winds of 55 km/h near the center, gustiness of up to 70 km/h , and central pressure of 998 hPa						
Present Movement						
East northeastward at 10 km/h						
Extent of Tropical Cyclone Winds						
Strong winds extend outwards up to 200 km from the center						
TRACK AND INTENSITY FORECAST

TROPICAL CYCLONE ADVISORY NO. 3

Tropical Depression

Issued at 11:00 PM, 13 September 2022

Valid for broadcast until the next advisory at 11:00 AM tomorrow

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- The tropical depression is forecast to track slowly northeastward slowly then sharply turn northwestward tomorrow. Afterwards, it will accelerate west northwestward throughout Thursday and Friday towards the northeastern portion of the Philippine Area of Responsibility (PAR). On the track forecast, it may enter the PAR region on Thursday evening or Friday early morning. Once inside the PAR, the domestic name "JOSIE" will be assigned to this tropical cyclone.
- This tropical cyclone may intensify into tropical storm within 12 hours. By Thursday, improving environmental conditions will enable the tropical cyclone to intensify at a relatively faster rate. Current forecast scenario shows that this tropical cyclone will enter the PAR as a typhoon.
- This tropical cyclone is forecast to remain far from the Philippine landmass and not directly affect the weather condition in the country. However, it may **enhance the Southwest Monsoon** within the forecast period. This may bring **monsoon rains** over the western sections of Southern Luzon and Visayas beginning tomorrow or on Thursday. As such, the **issuance of a Weather Advisory is not ruled out** should heavy rains become possible or likely.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless an intermediate advisory or initial tropical cyclone bulletin is released, the next tropical cyclone advisory will be issued at 11:00 AM tomorrow.
