

TROPICAL CYCLONE BULLETIN NR. 10F
Low Pressure Area (formerly "SALOME")
Issued at 5:00 PM, 23 October 2025

"SALOME" WEAKENS INTO A REMNANT LOW.

Location of Center (4:00 PM)

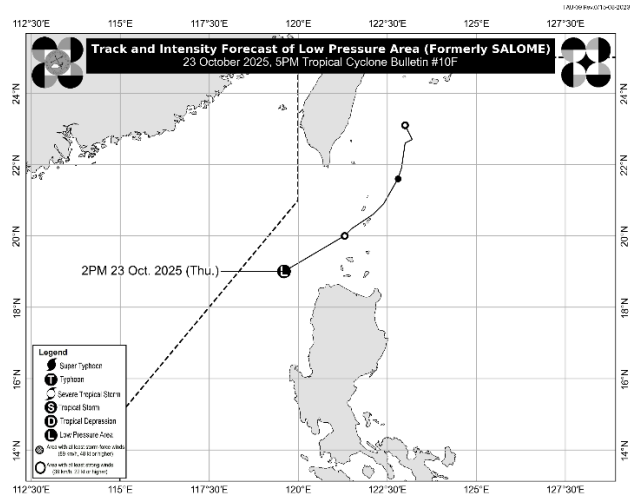

The Low Pressure Area (formerly "SALOME") was estimated based on all available data at **145 km West Northwest of Laoag City, Ilocos Norte (18.7°N, 119.3°E).**

Intensity

Central pressure of **1008 hPa**

Present Movement

Southwestward at 30 km/h

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal currently hoisted.

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The northeasterly windflow will also bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Cagayan including Babuyan Islands, Ilocos Norte, and Ilocos Sur.
- **Tomorrow (24 October):** Batanes, Cagayan including Babuyan Islands, and Ilocos Norte.
- **Saturday (25 October):** Batanes, Babuyan Islands, and Ilocos Norte.

TROPICAL CYCLONE BULLETIN NR. 10F

Low Pressure Area (formerly "SALOME")

Issued at 5:00 PM, 23 October 2025

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of Ilocos Norte.
- **Up to 3.5 m:** The seaboards of Batanes and Ilocos Sur.
- **Up to 3.0 m:** The seaboard of Babuyan Islands; the western seaboard of Pangasinan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of mainland Cagayan, Isabela, La Union, Zambales, and Kalayaan Islands; the remaining seaboards of Pangasinan; the northern and eastern seaboards of Camarines Norte, Camarines Sur, Catanduanes, Northern Samar, and Eastern Samar; the eastern seaboards of Dinagat, Siargao, and Bucas Grande Islands.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

Due to the cold and dry air from the northeasterly windflow, SALOME weakened into a Low Pressure Area at 2:00 PM today. The remnant low will continue to move generally southwestward and may dissipate within the next 24 hours.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development and re-entry occur, this is the final bulletin for this weather disturbance.
