## TROPICAL CYCLONE BULLETIN NR. 10

### Typhoon TINO (KALMAEGI)

Issued at 11:00 PM, 03 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

**Refer to Weather Advisory No. 10 issued at 11:00 PM today for the heavy rainfall outlook due to the Shear Line and TINO.**

##### Severe Winds

**The wind signals warn the public of the general wind threat** over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the localities where Wind Signal No. 2 is hoisted
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore the surge of the Northeast Monsoon and the shear line coinciding with the passage of TINO will also bring **strong to gale-force gusts** over the following areas **not under Wind Signal** (especially in coastal and upland areas exposed to winds):

- **Today:** Cagayan Valley, Cordillera Administrative Region, Ilocos Norte, Ilocos Sur, Aurora, Bulacan, Nueva Ecija, Bataan, Metro Manila, CALABARZON, MIMAROPA, and Bicol Region.
- **Tomorrow (04 November):** Cagayan Valley, Cordillera Administrative Region, Ilocos Norte, Ilocos Sur, Central Luzon, Metro Manila, CALABARZON, MIMAROPA, and Bicol Region.
- **Wednesday (05 November):** Ilocos Region, most of Cagayan Valley, most of Cordillera Administrative Region, Central Luzon, Metro Manila, CALABARZON, and MIMAROPA.

##### Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Masbate, Romblon, Oriental Mindoro, Occidental Mindoro, Palawan, Western Visayas, Negros Island Region, Central Visayas, Eastern Samar, Samar, Biliran, Leyte, Southern Leyte, Dinagat Islands, Surigao del Norte, Surigao del Sur, Agusan del Norte, Misamis Oriental, and Camiguin. **Refer to Storm Surge Warning No. 6 issued at 8:00 PM today for more details.**

- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

##### **Up to moderate seas over the following coastal waters:**

- **Up to 2.5 m:** The seaboard of Davao Occidental.
- **Up to 2.0 m:** The seabords of Zambales and Zamboanga del Norte; the western seaboard of Bataan; the seaboard of Batangas; the remaining seabords of Pangasinan, Palawan, Occidental Mindoro, and Oriental Mindoro.  
**Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

## TROPICAL CYCLONE BULLETIN NR. 10

### Typhoon TINO (KALMAEGI)

Issued at 11:00 PM, 03 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

#### TRACK AND INTENSITY OUTLOOK

- **Heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to hoisted Wind Signals and the “Other Hazards affecting Land Areas” section for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- TINO is now passing close to Homonhon Island and Dinagat Islands. It is then expected to make landfall over Leyte or Southern Leyte by midnight or tomorrow (04 November) early morning, before crossing Visayas and northern Palawan from tomorrow until Wednesday (05 November) early morning. This weather disturbance will likely emerge over the West Philippine Sea by Wednesday morning and is expected to exit the Philippine Area of Responsibility by Wednesday evening or Thursday (06 November) morning.
- TINO is forecast to make its initial landfall at or near peak intensity (*currently forecasted around 150-155 km/h maximum winds with higher gustiness*). Slight intensification before landfall remains likely. While the interaction of the typhoon with the terrain may trigger a slight weakening, TINO is expected to remain at typhoon category throughout its passage over the country.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 2:00 AM tomorrow.
