

**TROPICAL CYCLONE BULLETIN NR. 31F**  
**Super Typhoon NANDO (RAGASA)**  
Issued at 5:00 AM, 24 September 2025

NANDO MAINTAINS ITS STRENGTH AS IT TRAVERSES THE COASTAL WATERS SOUTH OF CHINA.						
Location of Center (4:00 AM)						
The center of the eye of Super Typhoon NANDO was estimated based on all available data at <b>775 km West of Itbayat, Batanes (OUTSIDE PAR) (21.2°N, 114.4°E).</b>						
Intensity						
Maximum sustained winds of <b>185 km/h</b> near the center, gustiness of up to <b>230 km/h</b> , and central pressure of <b>925 hPa</b>						
Present Movement						
West northwestward at 25 km/h						
Extent of Tropical Cyclone Winds						
Strong to typhoon-force winds extend outwards up to 650 km from the center						
TRACK AND INTENSITY FORECAST						
Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 PM 24 September 2025	21.4	112.6	960 km West of Extreme Northern Luzon (OUTSIDE PAR)	165	TY	W 20
24-Hour Forecast 2:00 AM 24 September 2025	21.4	110.1	1,220 km West of Extreme Northern Luzon (OUTSIDE PAR)	120	TY	W 20
36-Hour Forecast 2:00 PM 25 September 2025	21.5	107.5	1,490 km West of Extreme Northern Luzon (OUTSIDE PAR)	95	STS	W 20
TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT						
No Wind Signal is currently hoisted.						

## TROPICAL CYCLONE BULLETIN NR. 31F

### Super Typhoon NANDO (RAGASA)

Issued at 5:00 AM, 24 September 2025

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Refer to Weather Advisory No. 19 issued at 5:00 AM today for the heavy rainfall outlook due to the Southwest Monsoon enhanced by NANDO.

##### Severe Winds

The Southwest Monsoon and possible Easterlies, both enhanced by NANDO and OPONG, will bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of Luzon, Western Visayas, Surigao del Norte, and Dinagat Islands.
- **Tomorrow (25 September):** Batanes, Babuyan Islands, Cagayan, Ilocos Norte, Palawan, Siquijor, Camiguin, Surigao del Norte, Dinagat Islands, Davao Oriental, Davao del Sur, and Davao Occidental.

#### HAZARDS AFFECTING COASTAL WATERS

##### 24-Hour Sea Condition Outlook

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of Batanes and Babuyan Islands
- **Up to 3.5 m:** The seaboard of Ilocos Norte, Ilocos Sur, La Union, and Zambales; the western seaboard of Pangasinan and Bataan
- **Up to 3.0 m:** The seaboard of mainland Cagayan; the western seaboard of Lubang Island, Calamian Islands, and northern Palawan; the northwestern seaboard of Occidental Mindoro;
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboard of Isabela; the western seaboard of Cavite and Batangas; the remaining seaboard of Occidental Mindoro; and the remaining western seaboard of Palawan
- **Up to 2.0 m:** The southern seaboard of Bataan; the remaining seaboard of Palawan including Cuyo and Cagayancillo Islands; The northeastern seaboard of Aurora
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

##### Coastal Inundation

The threat of storm surge to any coastal area of the country has ceased. Refer to Storm Surge Warning No. 14 (Final) issued at 2:00 PM yesterday for the details.

**TROPICAL CYCLONE BULLETIN NR. 31F**  
**Super Typhoon NANDO (RAGASA)**

Issued at 5:00 AM, 24 September 2025

**TRACK AND INTENSITY OUTLOOK**

- NANDO is forecast to move generally west northwestward approaching the waters south of mainland China. It may make landfall over southern China this afternoon or evening.
- NANDO will begin to weaken due to marginally favorable environment over the waters south of mainland China and the increasing frictional effects due to proximity to land. Further weakening is expected post landfall this afternoon or evening.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
