

## TROPICAL CYCLONE BULLETIN NR. 1

### Tropical Depression RAMIL

Issued at 5:00 AM, 17 October 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

#### THE LOW PRESSURE EAST OF SOUTHEASTERN LUZON DEVELOPED INTO TROPICAL DEPRESSION RAMIL.

##### Location of Center (4:00 AM)

The center of Tropical Depression RAMIL was estimated based on all available data at **1,145 km East of Southeastern Luzon (14.4°N, 132.3°E)**.

##### Intensity

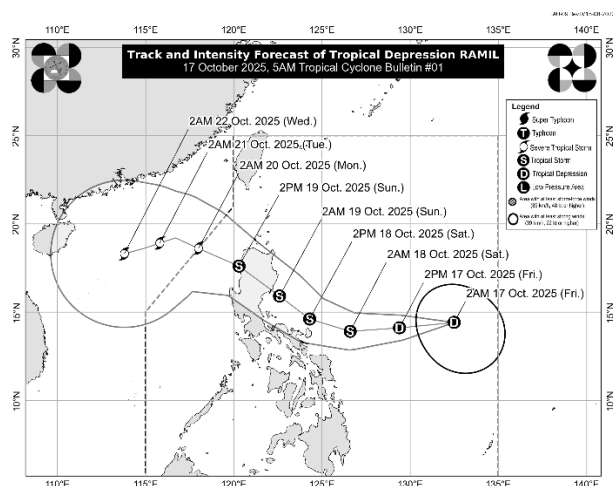

Maximum sustained winds of **45 km/h** near the center, gustiness of up to **55 km/h**, and central pressure of **1004 hPa**

##### Present Movement

**West northwestward slowly**

##### Extent of Tropical Cyclone Winds

**Strong winds** extend outwards up to **350 km** from the center

#### TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
<b>12-Hour Forecast</b> 2:00 PM 17 October 2025	14.1	129.4	565 km East of Virac, Catanduanes	55	TD	W 30
<b>24-Hour Forecast</b> 2:00 AM 18 October 2025	13.9	126.6	260 km East of Virac, Catanduanes	65	TS	W 25
<b>36-Hour Forecast</b> 2:00 PM 18 October 2025	14.6	124.3	285 km East of Infanta, Quezon	65	TS	WNW 20
<b>48-Hour Forecast</b> 2:00 AM 19 October 2025	15.9	122.6	65 km Southeast of Casiguran, Aurora	75	TS	NW 20
<b>60-Hour Forecast</b> 2:00 PM 19 October 2025	17.6	120.3	Over the coastal waters of San Vicente, Ilocos Sur	75	TS	NW 25
<b>72-Hour Forecast</b> 2:00 AM 20 October 2025	18.6	118.0	270 km West of Laoag City, Ilocos Norte	95	STS	WNW 20
<b>96-Hour Forecast</b> 2:00 AM 21 October 2025	18.9	115.8	505 km West of Laoag City, Ilocos Norte (OUTSIDE PAR)	100	STS	W 10
<b>120-Hour Forecast</b> 2:00 AM 22 October 2025	18.3	113.8	705 km West of Sinait, Ilocos Sur (OUTSIDE PAR)	110	STS	WSW 10

## TROPICAL CYCLONE BULLETIN NR. 1

### Tropical Depression RAMIL

Issued at 5:00 AM, 17 October 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
<b>1</b> Wind threat: <b>Strong winds</b>	<b>The easternmost portion of Quezon (Tagkawayan), Camarines Norte, Catanduanes, Camarines Sur, Albay, and the northern and eastern portions of Sorsogon (Donsol, Pilar, Castilla, City of Sorsogon, Gubat, Prieto Diaz, Casiguran, Barcelona, Bulusan)</b>	<b>The eastern portion of Northern Samar (Laoang, Catubig, Palapag, Mapanas, Gamay, Lapinig, Pambujan, San Roque)</b>	-
Warning lead time: <b>36 hours</b> Range of wind speeds: <b>39 to 61 km/h (Beaufort 6 to 7)</b> Potential impacts of winds: <b>Minimal to minor threat to life and property</b>			

OTHER HAZARDS AFFECTING LAND AREAS
<b>Heavy Rainfall Outlook</b>  Refer to Weather Advisory No. 1 issued at 5:00 AM today for the heavy rainfall outlook due to Tropical Cyclone RAMIL.
<b>Severe Winds</b>  The wind signals warn the public of the <b>general wind threat</b> over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction. <ul style="list-style-type: none"><li>• <b>Minimal to minor impacts</b> from strong winds are possible within any of the areas under Wind Signal No. 1.</li></ul> The highest Wind Signal that will likely be hoisted throughout its passage is <b>Wind Signal No. 2</b> . However, <b>the possibility of reaching severe tropical storm category before landfall is not ruled out, the worst case scenario is Wind Signal No. 3</b> .  Furthermore the periphery of RAMIL and the easterlies will also bring <b>strong to gale-force gusts</b> over the following areas <b>not under Wind Signal</b> (especially in coastal and upland areas exposed to winds): <ul style="list-style-type: none"><li>• <b>Today:</b> Cagayan Valley, Ilocos Norte, Ilocos Sur, Aurora, Quezon including Polillo Islands, Sorsogon, Marinduque, Mindoro Provinces, Masbate, and Northern Samar.</li></ul>

## TROPICAL CYCLONE BULLETIN NR. 1

### Tropical Depression RAMIL

Issued at 5:00 AM, 17 October 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

#### HAZARDS AFFECTING COASTAL WATERS

**Gale Warning may be raised** over the northern seaboard of Eastern Visayas and the seaboard of Southern Luzon this afternoon or tomorrow (18 October) morning in anticipation of rough to very rough sea conditions.

##### 24-Hour Sea Condition Outlook

**Up to rough seas over the following coastal waters:**

- **Up to 4.0 m:** The northern and eastern seaboard of Catanduanes; the northern seaboard of Camarines Sur
- **Up to 3.5 m:** The rest of the seaboard of Catanduanes; and the northern seaboard of Northern Samar
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

**Up to moderate to rough seas over the following coastal waters:**

- **Up to 2.5 m:** The seaboard of Batanes, Babuyan Islands, mainland Cagayan, Isabela, Aurora, Quezon including Polillo Islands, and Camarines Norte; the eastern seaboard of Albay and Sorsogon; the rest of the seaboard of Camarines Sur; the northwestern seaboard of Ilocos Norte; the northeastern seaboard of Eastern Samar; the eastern seaboard of Northern Samar
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

#### TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- RAMIL is forecast to move generally westward until tomorrow before turning west northwestward towards the area of Central-Southern Luzon. On the forecast track, the center of RAMIL may pass close Catanduanes tomorrow (18 October) morning or afternoon and may make landfall in Aurora or Quezon by Sunday (19 October) morning or afternoon. A southward shift of the track could lead to a different landfall area and more inclusion of localities under Wind Signal. After landfall, RAMIL may traverse the rugged terrain of Northern or Central Luzon and will emerge over the West Philippine Sea by Sunday afternoon or evening and exits the Philippine Area of Responsibility by Monday (20 October) morning.
- RAMIL will continue to intensify while over the Philippine Sea and may reach tropical storm category tomorrow early morning. Further intensification into a severe tropical storm prior to landfall is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
