Warning lead time: <b>36 hours</b> Range of wind speeds: <b>39 to 61 km/h (Beaufort 6 to 7)</b> Potential impacts of winds: <b>Minimal to minor threat to life and property</b>			

OTHER HAZARDS AFFECTING LAND AREAS
<b><u>Severe Winds</u></b>  <b>The wind signals warn the public of the general wind threat</b> over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction. <ul style="list-style-type: none"><li>• <b>Minimal to minor impacts</b> from strong winds are possible within any of the areas under Wind Signal No. 1.</li></ul> Furthermore, the outer rain bands of PAOLO will also bring <b>strong to gale-force gusts</b> over the following areas <b>not under Wind Signal</b> (especially in coastal and upland areas exposed to winds): <ul style="list-style-type: none"><li>• <b>Today:</b> Batanes, northern portion of mainland Cagayan including Babuyan Islands, Apayao, Zambales, and Bataan</li></ul> <b><u>Coastal Inundation</u></b>  There is a <b>minimal to moderate risk of storm surge</b> with peak heights reaching <b>1.0 to 2.0 m</b> within 12 hours over the low-lying or exposed coastal localities of Ilocos Norte, Ilocos Sur, La Union, Pangasinan, and Zambales. <b>Refer to Storm Surge Warning No. 11 issued at 2:00 AM today for the details.</b>

**TROPICAL CYCLONE BULLETIN NR. 18**  
**Severe Tropical Storm PAOLO (MATMO)**

Issued at 5:00 AM, 03 October 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

**HAZARDS AFFECTING COASTAL WATERS**

**24-Hour Sea Condition Outlook**

**Up to moderate to rough seas over the following coastal waters:**

- **Up to 4.0 m:** The seaboard of mainland Cagayan, Babuyan Islands, Ilocos Norte, Ilocos Sur, and La Union.
- **Up to 3.5 m:** The seaboard of Batanes and Pangasinan.
- **Up to 2.5 m:** The seaboard of Isabela, northern Aurora, and Zambales.
- **Up to 2.0 m:** The remaining seaboard of Aurora, the western seaboard of Bataan, and the seaboard of Lubang Island.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

**TRACK AND INTENSITY OUTLOOK**

- **It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- PAOLO will continue moving west northwestward towards southern China. While moving over the West Philippine Sea, PAOLO will re-intensify into a typhoon this morning or afternoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
