Issued at 5:00 AM, 09 August 2025

"FABIAN" WEAKENS INTO A REMNANT LOW.

Location of Center (4:00 AM)

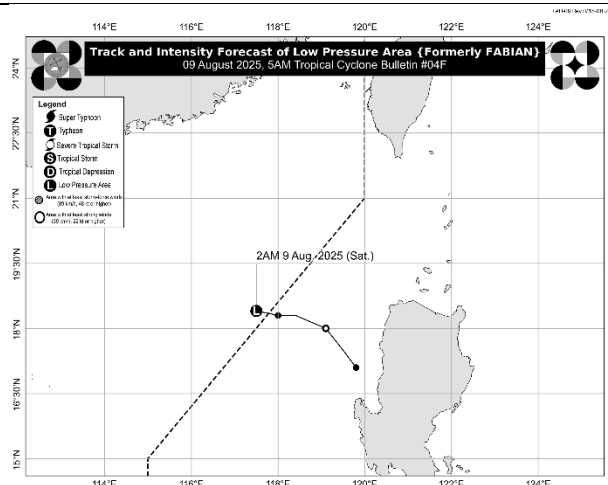

The Low Pressure Area (formerly "FABIAN") was estimated based on all available data at **365 km West of Laoag City, Ilocos Norte (18.7°N, 117.1°E)**.

Intensity

Central pressure of **1008 hPa**

Present Movement

West northwestward slowly

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal currently hoisted.

OTHER HAZARDS AFFECTING LAND AREAS

The remnant low is unlikely to directly affect the weather condition in the country.

HAZARDS AFFECTING COASTAL WATERS

The remnant low is unlikely to directly affect the sea condition of the coastal waters in the country.

TRACK AND INTENSITY OUTLOOK

FABIAN exited the Philippine Area of Responsibility as tropical depression at 1:00 AM today. Then, it weakened into a remnant low at 2:00 PM today. The remnant low will continue moving west northwestward over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development and re-entry occur, this is the final bulletin for this weather disturbance.
