

TROPICAL CYCLONE BULLETIN NR. 2 Severe Tropical Storm TINO (KALMAEGI)

Issued at 5:00 PM, 02 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

“TINO” INTENSIFIES INTO ASEVERE TROPICAL STORM WHILE OVER THE PHILIPPINE SEA

Location of Center (4:00 PM)

The center of Severe Tropical Storm TINO was estimated based on all available data at **805 km East of Eastern Visayas (11.4°N, 133.1°E)**

Intensity

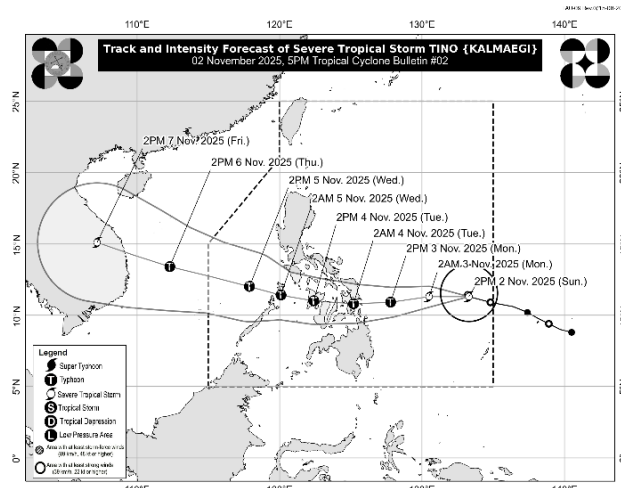

Maximum sustained winds of **95 km/h** near the center, gustiness of up to **115 km/h**, and central pressure of **990 hPa**

Present Movement

Westward at 30 km/h

Extent of Tropical Cyclone Winds

Strong to storm-force winds extend outwards up to **240 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 03 November 2025	11.3	130.5	520 km East of Guiuan, Eastern Samar	110	STS	W 25

TROPICAL CYCLONE BULLETIN NR. 2
Severe Tropical Storm TINO (KALMAEGI)

Issued at 5:00 PM, 02 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1 Wind threat: Strong winds	-	Eastern Samar, Northern Samar, Samar, Biliran, Leyte, Southern Leyte, and Camotes Islands	Dinagat Islands and Surigao del Norte
Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property			

OTHER HAZARDS AFFECTING LAND AREAS
<p><u>Heavy Rainfall Outlook</u></p> <p>Refer to Weather Advisory No. 5 issued at 5:00 PM today for the heavy rainfall outlook due to TINO.</p> <p><u>Severe Winds</u></p> <p>The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.</p> <ul style="list-style-type: none"> Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1. <p>The highest Wind Signal that will likely be hoisted throughout its passage is Wind Signal No. 4.</p> <p>Furthermore the surge of the Northeast Monsoon coinciding with the passage of TINO will also bring strong to gale-force gusts over the following areas not under Wind Signal (especially in coastal and upland areas exposed to winds):</p> <ul style="list-style-type: none"> Today: Batanes, Babuyan Islands, Ilocos Norte, the northern and eastern portion of mainland Cagayan, the eastern portion of Isabela, Aurora, Quezon, Lubang Islands, Marinduque, Calaguas Islands, and Caluya Islands Tomorrow (03 November): Most of Cagayan Valley, most of Cordillera Administrative Region, Ilocos Norte, Aurora, Bulacan, Bataan, Metro Manila, CALABARZON, MIMAROPA, and Bicol Region. Tuesday (04 November): Most of Cagayan Valley, most of Cordillera Administrative Region, Ilocos Norte, Ilocos Sur, most of Central Luzon, Metro Manila, CALABARZON, MIMAROPA, and Bicol Region. <p><u>Coastal Flooding</u></p> <p>There is a high risk of life-threatening and damaging storm surge within the next 48 hours over the low-lying coastal communities of Sorsogon, Masbate, Northern Samar, Eastern Samar, Samar, Biliran, Leyte, Southern Leyte, Cebu, Bohol, Siquijor, Negros Oriental, Negros Occidental, Capiz, Iloilo, Guimaras, Dinagat Islands, Surigao del Norte, Surigao del Sur, Agusan del Norte, Misamis Oriental, and Camiguin. Refer to Storm Surge Warning No. 1 issued at 2:00 PM today for more details.</p>

TROPICAL CYCLONE BULLETIN NR. 2
Severe Tropical Storm TINO (KALMAEGI)

Issued at 5:00 PM, 02 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning may be raised over the eastern seaboard of Eastern Visayas and Caraga Region tonight or tomorrow (03 November) early morning in anticipation of **very rough sea conditions or worse.**

24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- **Up to 7.0 m:** The seaboard of Eastern Samar
- **Up to 6.0 m:** The northern and eastern seaboard of Siargao and Bucas Grande Islands.
- **Up to 4.5 m:** The eastern seaboard of Northern Samar
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of Batanes, Babuyan Islands, and Ilocos Norte; the eastern seaboard of mainland Cagayan, Isabela, Leyte, and Southern Leyte; the western seaboard of Dinagat Islands.
- **Up to 3.5 m:** The remaining seaboard of mainland Cagayan; the seaboard of Ilocos Sur, Aurora, northern mainland Quezon, Camarines Norte, and Surigao del Sur; the northern and eastern seaboard of Polillo Islands and Catanduanes; the northern seaboard of Northern Samar; the eastern seaboard of Albay and Sorsogon.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Catanduanes, Eastern Visayas, Dinagat Islands, and Surigao del Norte; the eastern seaboard of Camarines Sur.
- **Up to 2.0 m:** The seaboard of La Union, Central Visayas, Northern Mindanao, and Davao Occidental; the eastern seaboard of mainland Quezon and Davao Oriental; the western seaboard of Pangasinan; the remaining seaboard of Bicol Region and Caraga Region.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 2 Severe Tropical Storm TINO (KALMAEGI)

Issued at 5:00 PM, 02 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

- **Heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to hoisted Wind Signals and the “Other Hazards affecting Land Areas” section for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- On the track forecast, TINO will move generally westward over the next three days and make its initial landfall over Eastern Samar or Dinagat Islands tomorrow (03 November) late evening or on Tuesday (04 November) early morning. Afterwards, TINO will traverse Visayas and northern Palawan before emerging over the West Philippine Sea on Wednesday (05 November) morning or afternoon.
- TINO is forecast to continuously intensify and may reach typhoon category within the next 24 hours. Furthermore, it will likely make its initial landfall at or near peak intensity (*currently forecasted around 150-165 km/h maximum winds with higher gustiness*). Rapid intensification within the next 48 hours is likely. The possibility of reaching super typhoon category is not ruled out based on alternate scenarios and climatological data. While the passage over country will trigger a slight weakening, TINO is expected to remain as a typhoon throughout its passage over the country.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
