## TROPICAL CYCLONE BULLETIN NR. 10

### Super Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 09 November 2025

Valid for broadcast until the next bulletin at 2:00 PM today.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Refer to Weather Advisory No. 10 issued at 11:00 AM today for the heavy rainfall outlook due to TC UWAN.

##### Severe Winds

The wind signals warn the public of the **general wind threat** over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Extreme impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 5.
- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (09 November):** Palawan, Visayas, and Mindanao.
- **Tomorrow (10 November):** Most of Luzon and Visayas.
- **Tuesday (11 November):** Most of Luzon

##### Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Cagayan, Isabela, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Aurora, Zambales, Bataan, Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Quezon, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, Northern Samar, Eastern Samar, Dinagat Islands, and Siargao and Bucas Grande Islands. **Refer to Storm Surge Warning No. 7 issued at 8:00 AM today for more details.**

## **TROPICAL CYCLONE BULLETIN NR. 10** **Super Typhoon UWAN (FUNG-WONG)**

Issued at 11:00 AM, 09 November 2025

- **Up to 2.0 m:** The seaboard of Sarangani; the western seaboard of Sulu and Tawi-Tawi; the remaining seaboard of Davao Region.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

## TROPICAL CYCLONE BULLETIN NR. 10

### Super Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 09 November 2025

Valid for broadcast until the next bulletin at 2:00 PM today.

#### TRACK AND INTENSITY OUTLOOK

Do not focus on the center track as it may still shift within the limit of the forecast confidence cone. Heavy rainfall, severe winds, and storm surge may still be experienced far from the landfall point or center track, and even in areas outside the forecast confidence cone. **Always refer to the latest hazard warnings currently in effect (e.g., Wind Signals, Heavy Rainfall Warnings, Storm Surge Warnings) and the information under “Other Hazards affecting Land Areas” of this bulletin for more details.**

- UWAN is forecast to move west northwestward over the next 24 hours. On the track forecast, the center of the eye of UWAN will continue to move over the coastal waters of Catanduanes, **pass close to Calaguas and Polillo Islands** this morning and afternoon, respectively, before **making landfall at or near its peak intensity (e.g., as a super typhoon or an upper limit typhoon) over the central portion of Aurora** tonight or tomorrow (10 November) early morning. **Due to its proximity, a direct hit (i.e., eyewall affecting the area without making landfall) over Calaguas and Polillo Islands is possible.**
- After landfall, UWAN will traverse the mountainous terrain of Northern Luzon and emerge over Lingayen Gulf or the coastal waters of Pangasinan or La Union on tomorrow morning. The interaction with the terrain will cause UWAN to weaken significantly, but it is expected to remain as typhoon throughout its passage over Northern Luzon.
- UWAN will begin to turn northwestward to northward from tomorrow to Tuesday (11 November) while remaining at typhoon category. On Wednesday (12 November), UWAN will turn northeastward towards the Taiwan Strait while weakening. It is forecast to make landfall over western Taiwan on Thursday (13 November), then rapidly weaken over the Taiwan landmass before emerging over the waters near Ryukyu Islands as a remnant low or weak tropical depression.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 2:00 PM today.
