TROPICAL CYCLONE BULLETIN NR. 15
Severe Tropical Storm PAOLO (MATMO)

Issued at 5:00 PM, 03 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 9 issued at 5:00 PM today for the heavy rainfall outlook due to Tropical Cyclone PAOLO.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, the outer rain bands of PAOLO will also bring **strong to gale-force gusts** over the following areas **not under Wind Signal** (especially in coastal and upland areas exposed to winds):

- **Today:** Bataan, Metro Manila, CALABARZON, Bicol Region, Panay Island, Occidental Mindoro, Oriental Mindoro, Northern Samar, and Eastern Samar
- **Tomorrow (4 October):** Batanes, Cagayan including Babuyan Islands, Ilocos Region, Zambales, and Bataan

Coastal Inundation

There is a **moderate to high risk of life-threatening storm surge** with peak heights reaching **1.0 to 3.0 m** within 24 hours over the low-lying or exposed coastal localities of Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Zambales, Cagayan, Isabela, and Aurora. **Refer to Storm Surge Warning No. 9 issued at 2:00 PM today for the details.**

TROPICAL CYCLONE BULLETIN NR. 15
Severe Tropical Storm PAOLO (MATMO)

Issued at 5:00 PM, 03 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning is in effect over the seaboard of Northern Luzon and the eastern seaboard of Central Luzon. For more details, refer to Gale Warning No. 4 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to high over the following coastal waters:

- **Up to 6.0 m:** The seaboard of Ilocos Sur
- **Up to 5.0 m:** The seaboard of Ilocos Norte; the eastern seaboard of mainland Cagayan.
- **Up to 4.5 m:** The seaboard of La Union, Babuyan Islands, Isabela, and northern Aurora; the remaining seaboard of mainland Cagayan.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The western seaboard of Pangasinan.
- **Up to 3.5 m:** The seaboard of Batanes.
- **Up to 3.0 m:** The seaboard of Zambales; the remaining seaboard of Aurora and Pangasinan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboard of northern mainland Quezon; the northern and eastern seaboard of Polillo Islands.
- **Up to 2.0 m:** The seaboard of Zambales, Camarines Norte, and Lubang Islands; the western seaboard of Bataan; the eastern seaboard of the rest of Quezon; the northern seaboard of Camarines Sur; the northern and eastern seaboard of Catanduanes.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- PAOLO is forecast to move generally west northwestward and exit the Philippine Area of Responsibility tomorrow (04 October) morning.
- PAOLO is forecast to re-intensify into a typhoon within the next 12 hours.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 PM today.
