TROPICAL CYCLONE BULLETIN NR. 3F

Tropical Storm QUEDAN (NAKRI)

Issued at 5:00 AM, 10 October 2025

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

QUEDAN is less likely to directly affect the weather condition in the country.

Severe Winds

The southwesterlies and the northeasterly windflow may bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Southern Leyte, Surigao del Norte, Dinagat Islands, and Palawan.
- **Tomorrow (11 October):** Palawan

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

QUEDAN is unlikely to affect the sea condition in the coastal waters of the country.

TRACK AND INTENSITY OUTLOOK

QUEDAN is forecast to move generally northwestward throughout the forecast period and will continue to intensify while approaching Ryukyu Islands.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
