**TROPICAL CYCLONE BULLETIN NR. 7F**  
**Severe Tropical Storm BISING {DANAS}**

Issued at 11:00 AM, 07 July 2025

**OTHER HAZARDS AFFECTING LAND AREAS**

**Heavy Rainfall Outlook**

Refer to Weather Advisory issued No. 5 at 11:00 AM today for the heavy rainfall outlook due to the Southwest Monsoon.

**Severe Winds**

The southwest monsoon will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (7 July):** Ilocos Region, Cagayan, Isabela, Aurora, Zambales, Bataan, Quezon, Occidental Mindoro, Masbate, and Romblon
- **Tomorrow (8 July):** Ilocos Region, Cagayan, Isabela, Aurora, Zambales, Bataan, Quezon, Masbate, Romblon, Occidental Mindoro, and Palawan.
- **Wednesday (9 July):** Ilocos Region, Cagayan, Aurora, Zambales, Bataan, Quezon, Masbate, Romblon, Occidental Mindoro, and Palawan.

**HAZARDS AFFECTING COASTAL WATERS**

**24-Hour Sea Condition Outlook**

Moderate to rough seas over the following coastal waters:

- Up to 3.0 m: The seaboard of Batanes and the western and northern seaboards of Babuyan Islands and Ilocos Norte.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- Up to 2.5 m: The seaboard of Zambales, and the remaining seaboards of Ilocos Region and Babuyan Islands.
- Up to 2.0 m: The seaboards of Bataan and Lubang Islands.
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

**TRACK AND INTENSITY OUTLOOK**

- BISING has exited the Philippine Area of Responsibility (PAR) at 5:00 AM today. On the forecast track, it will move north northeastward over the next 12 hours before turning northward over the East China Sea by tomorrow (08 July) morning. By tomorrow afternoon, it is forecast to turn generally westward, making landfall over the Eastern China region. It will continue to move west southwestward until it becomes a remnant low by Wednesday (09 July).
- BISING will continue to weaken over the East China Sea due to unfavorable conditions. It is forecast to weaken into a remnant low by Wednesday (09 July) as it moves over the landmass of Eastern China.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
