Tropical Storm SALOME

Issued at 2:00 AM, 23 October 2025

Valid for broadcast until the next bulletin at 5:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
2 Wind threat: Gale-force winds	Batanes Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property	-	-
1 Wind threat: Strong winds	The western portion of Babuyan Islands (Calayan Is., Dalupiri Is.), and the northwestern portion of Ilocos Norte (Bangui, Pagudpud, Burgos, Pasuquin, Bacarra, Laoag City) Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property	-	-

OTHER HAZARDS AFFECTING LAND AREAS			
Heavy Rainfall Outlook			
Refer to Weather Advisory No. 3 issued at 11:00 PM yesterday for the heavy rainfall outlook due to Tropical Cyclone SALOME.			
Severe Winds			
<p>The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.</p> <ul style="list-style-type: none"> • Minor to moderate impacts from gale-force winds are possible within any of the localities where Wind Signal No. 2 is hoisted • Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1. <p>The highest Wind Signal that will likely be hoisted throughout its passage is Wind Signal No. 1. However, the possibility of reaching tropical storm category is not ruled out, the worst case scenario is Wind Signal No. 2.</p> <p>Furthermore northeasterly windflow will also bring strong to gale-force gusts over the following areas not under Wind Signal (especially in coastal and upland areas exposed to winds):</p> <ul style="list-style-type: none"> • Today: Batanes, Babuyan Islands, Cagayan, Ilocos Norte, and Ilocos Sur. • Tomorrow (24 October): Batanes, Babuyan Islands, Cagayan, and Ilocos Norte. • Saturday (25 October): Batanes and Babuyan Islands 			

TROPICAL CYCLONE BULLETIN NR. 6

Tropical Storm SALOME

Issued at 2:00 AM, 23 October 2025

Valid for broadcast until the next bulletin at 5:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning is in effect over the seaboard of Extreme Northern Luzon. Refer to Gale Warning No. 3 issued at 5:00 PM yesterday.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- Up to 6.0 m: The seaboard of Batanes.
- Up to 4.5 m: The northwestern seabards of Babuyan Islands.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- Up to 4.0 m: The seaboard of Ilocos Norte; the remaining seabards of Babuyan Islands.
- Up to 3.5 m: The seaboard of Ilocos Sur, the northern seaboard of mainland Cagayan.
- Up to 3.0 m: The western seaboard of Pangasinan; the remaining seaboard of mainland Cagayan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- Up to 2.5 m: The seabards of Isabela, La Union, Zambales and Kalayaan Islands; the remaining seabards of Pangasinan; the northern and eastern seabards of Camarines Norte, Camarines Sur, Catanduanes, Northern Samar, and Eastern Samar.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

- SALOME is forecast to move generally southwestward throughout the forecast period due to the High-Pressure Area over mainland China. On the forecast track, SALOME may pass close or make landfall over Batanes within the next 12 hours. This weather disturbance may also pass close or over Babuyan Islands by this morning and in Ilocos Norte by noon or afternoon.
- SALOME is forecast to weaken into a tropical depression within the next 12 hours and will follow a weakening trend until it becomes a remnant low by Friday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM today.
