## TROPICAL CYCLONE BULLETIN NR. 9

### Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 AM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Refer to Weather Advisory No. 9 issued at 5:00 AM today for the heavy rainfall outlook due to TC UWAN.

##### Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Extreme impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 5.
- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (09 November):** Palawan, Visayas, and Mindanao.
- **Tomorrow (10 November):** Most of Luzon and Visayas.
- **Tuesday (11 November):** Most of Luzon

##### Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Cagayan, Isabela, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Aurora, Zambales, Bataan, Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Quezon, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, Northern Samar, Eastern Samar, Dinagat Islands, and Siargao and Bucas Grande Islands. Refer to **Storm Surge Warning No. 7 issued at 5:00 AM today for more details.**

- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

##### **Up to moderate to rough seas over the following coastal waters:**

- **Up to 2.5 m:** The remaining seabards of MIMAROPA and Visayas.
- **Up to 2.0 m:** The remaining seaboard of Mindanao
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

## TROPICAL CYCLONE BULLETIN NR. 9

### Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 AM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

#### TRACK AND INTENSITY OUTLOOK

- Heavy rainfall, severe winds, and storm surge may still be experienced in localities far from the landfall point and outside the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.
- UWAN is forecast to move west northwestward over the next 24 hours. On the track forecast, the center of the eye of UWAN may pass close to Catanduanes this morning and make landfall over Aurora tonight or tomorrow early morning. Due to its proximity, a direct hit (i.e., eyewall affecting the area without making landfall) or a landfall scenario over Catanduanes is possible.
- UWAN may make landfall at or near its peak lifetime intensity. The interaction with the terrain will cause UWAN to weaken significantly, but it is expected to remain as a typhoon throughout its passage over Northern Luzon.
- After landfall, UWAN will traverse the mountainous terrain of Northern Luzon and emerge over Lingayen Gulf or the coastal waters of Pangasinan or La Union on tomorrow morning. By Tuesday (11 November), UWAN will begin to move northwestward until it exits the Philippine Area of Responsibility (PAR) before turning northeastward. The center of UWAN will re-enter the northwestern boundary of PAR by Thursday (13 November) traversing the landmass of Taiwan and will exit PAR by Friday (14 November) morning.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
