TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal currently hoisted.

OTHER HAZARDS AFFECTING LAND AREAS

FABIAN is unlikely to directly affect the weather condition in the country within the forecast period.

HAZARDS AFFECTING COASTAL WATERS

FABIAN will bring moderate seas (1.0-1.5 m) over the coastal waters of Northern Luzon.

Mariners of motor bancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigating in these conditions, especially if inexperienced or operating ill-equipped vessels.

TROPICAL CYCLONE BULLETIN NR. 3

Tropical Depression FABIAN

Issued at 11:00 PM, 08 August 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TRACK AND INTENSITY OUTLOOK

FABIAN is forecast to move generally west northwestward until it exits the Philippine Area of Responsibility (PAR) tonight or tomorrow early morning. FABIAN is forecast to weaken into a remnant low tomorrow morning.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
