TROPICAL CYCLONE BULLETIN NR. 19F
Severe Tropical Storm PAOLO (MATMO)

Issued at 11:00 AM, 04 October 2025

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The outer rain bands of PAOLO will also bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, northern portion of mainland Cagayan including Babuyan Islands, Apayao, Zambales, and Bataan.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to moderate to rough seas over the following coastal waters:

- **Up to 3.0 m:** The seaboard of Ilocos Region.
- **Up to 2.5 m:** The seabards of Batanes, Babuyan Islands, and Zambales.
- **Up to 2.0 m:** The seabards of mainland Cagayan, Isabela, and Bataan.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

- PAOLO will continue moving west northwestward towards southern China. While moving over the West Philippine Sea, PAOLO may re-intensify into a typhoon today.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
