TROPICAL CYCLONE BULLETIN NR. 2

Tropical Depression HUANING

Issued at 11:00 AM, 18 August 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

HUANING is unlikely to directly affect the country throughout the forecast period.

HAZARDS AFFECTING COASTAL WATERS

HUANING is unlikely to affect the sea condition in the coastal waters of the country.

TRACK AND INTENSITY OUTLOOK

- HUANING is forecast to move generally northward and exit the Philippine Area of Responsibility (PAR) tonight or tomorrow (19 August) morning. On the track forecast, the tropical depression may pass close or over Okinawa Islands tomorrow morning or afternoon.
- HUANING will likely remain as a tropical depression throughout the forecast period. However, intensification into a tropical storm remains not ruled out but not the most likely scenario at this time.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
