

TROPICAL CYCLONE BULLETIN NR. 6

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 PM, 08 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

TYPHOON "UWAN" FURTHER INTENSIFIES AS IT CONTINUES TO MOVE CLOSER TOWARDS BICOL REGION	
Location of Center (10:00 PM)	
The center of the eye of Typhoon UWAN was estimated based on all available data at 380 km East of Virac, Catanduanes (13.5°N, 127.7°E)	
Intensity	
Maximum sustained winds of 155 km/h near the center, gustiness of up to 190 km/h , and central pressure of 950 hPa	
Present Movement	
West northwestward at 35 km/h	
Extent of Tropical Cyclone Winds	
Strong to typhoon-force winds extend outwards up to 800 km from the center	

TRACK AND INTENSITY FORECAST

TROPICAL CYCLONE BULLETIN NR. 6

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 PM, 08 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 8 issued at 11:00 PM today for the heavy rainfall outlook due to TC UWAN.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that will likely be hoisted throughout its passage is **Wind Signal No. 5**.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today and tomorrow (09 November):** Palawan, Visayas, and Mindanao.
- **Monday (10 November):** Most of Luzon and Visayas.

Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Cagayan, Isabela, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Aurora, Zambales, Bataan, Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Quezon, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, Northern Samar, Eastern Samar, Dinagat Islands, and Siargao and Bucas Grande Islands. Refer to **Storm Surge Warning No. 5 issued at 8:00 PM today for more details**.

TROPICAL CYCLONE BULLETIN NR. 6

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 PM, 08 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seabards of Northern and Central Luzon, the eastern and southern seabards of Southern Luzon, and the eastern and central seabards of Visayas and Mindanao. For more details, refer to Gale Warning No. 5A issued at 11:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough, high, or very high seas over the following coastal waters:

- **Up to 14.0 m:** The northern and eastern seabards of Catanduanes, Camarines Sur, and Polillo Islands; the northern seaboard of Camarines Norte; the seabards of Aurora.
- **Up to 12.0 m:** The seabards of Isabela; the eastern seabards of mainland Cagayan, Albay, and Sorsogon; the northern and eastern seabards Northern Samar.
- **Up to 9.0 m:** The seaboard of northern mainland Quezon; the northeastern seaboard of Eastern Samar.
- **Up to 7.0 m:** The eastern seaboard of Eastern Samar; the remaining seabards of mainland Cagayan.
- **Up to 6.0 m:** The seabards of Batanes, Babuyan Islands, Ilocos Norte, Ilocos Sur, Pangasinan, and Zambales; the eastern seaboard of Quezon; the remaining seabards of Polillo Islands, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, and Northern Samar.
- **Up to 5.0 m:** The seabards of Dinagat Islands and Siargao and Bucas Grande Islands.
- **Up to 4.5 m:** The seabards of Marinduque, Romblon, Masbate including Burias and Ticao Islands, Capiz, northern Iloilo, Samar, Biliran, Southern Leyte and Surigao del Sur; the northern and eastern seaboard of Leyte; the northern seabards of Cebu including Bantayan Islands; the western seaboard of Bataan; the remaining seabards of Quezon and Eastern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seabards of Lubang Island and Aklan; the western seaboard of Batangas; the eastern seaboard of Davao Oriental; the remaining seaboard of Leyte.
- **Up to 3.5 m:** The seabards of Pampanga, Bulacan, Metro Manila, and Cavite; the northern seabards of Occidental Mindoro, Oriental Mindoro, and Negros Occidental; the northwestern seabards of Cebu and Bohol; the remaining seabards of Bataan and Batangas.
- **Up to 3.0 m:** The seabards of Northern Mindanao, Siquijor, Zamboanga del Norte, and Agusan del Norte; the western seaboard of northern Palawan including Calamian Islands; the southern seabards of Negros Occidental, Negros Oriental, and Bohol.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seabards of MIMAROPA and Visayas.
- **Up to 2.0 m:** The remaining seaboard of Mindanao
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 6

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 PM, 08 November 2025

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

TRACK AND INTENSITY OUTLOOK

- Heavy rainfall, severe winds, and storm surge may still be experienced in localities far from the landfall point and outside the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.
- UWAN is forecast to move west northwestward today and tomorrow (9 November). On the track forecast, the center of the eye of UWAN may pass close to Catanduanes tomorrow morning and make landfall over Aurora tomorrow (09 November) evening or Monday early morning. Furthermore, there is also an increasing possibility of a slight southward shift in the projected path of UWAN, which may result to a direct hit (i.e., eyewall affecting the area without making landfall) or a landfall scenario over Catanduanes.
- After landfall, UWAN will traverse the mountainous terrain of Northern Luzon and emerge over Lingayen Gulf or the coastal waters of Pangasinan or La Union on Monday morning.
- UWAN is forecast to rapidly intensify and may reach super typhoon category tomorrow, although the potential for a much faster intensification is not ruled out due to favorable environment. It may also make landfall at or near its peak lifetime intensity. The interaction with the terrain will cause UWAN to weaken significantly, but it is expected to remain as a typhoon throughout its passage over Northern Luzon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 2:00 AM tomorrow.
