

TROPICAL CYCLONE BULLETIN NR. 2

Tropical Depression SALOME

Issued at 2:00 PM, 22 October 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

SALOME MAINTAINS ITS STRENGTH AS IT REMAINS ALMOST STATIONARY.

Location of Center (1:00 PM)

The center of Tropical Depression SALOME was estimated based on all available data at **255 km North Northeast of Itbayat, Batanes (22.7°N, 123.2°E)**.

Intensity

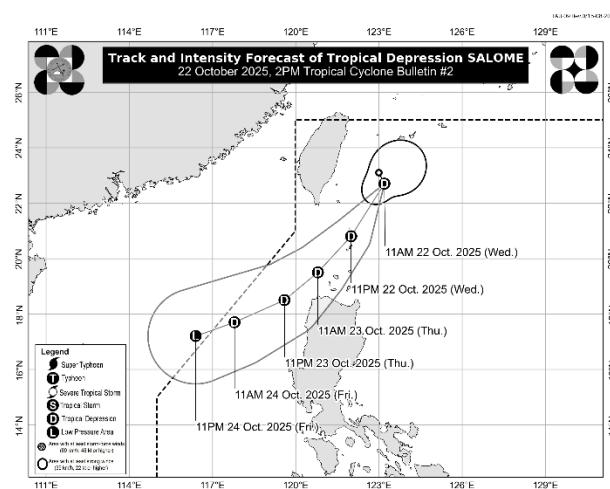

Maximum sustained winds of **55 km/h** near the center, gustiness of up to **70 km/h**, and central pressure of **1006 hPa**

Present Movement

Almost Stationary

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to **200 km** from the center

TROPICAL CYCLONE BULLETIN NR. 2

Tropical Depression SALOME

Issued at 2:00 PM, 22 October 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 1 issued at 11:00 AM today for the heavy rainfall outlook due to Tropical Cyclone SALOME.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that will likely be hoisted throughout its passage is Wind Signal No. 1. However, the possibility of reaching tropical storm category is not ruled out, the worst case scenario is Wind Signal No. 2.

Furthermore northeasterly windflow will also bring strong to gale-force gusts over the following areas not under Wind Signal (especially in coastal and upland areas exposed to winds):

- Today: Ilocos Norte, Ilocos Sur, and Cagayan.
- Tomorrow (23 October): Batanes, Babuyan Islands, Cagayan, Ilocos Norte, and Ilocos Sur.
- Friday (24 October): Batanes, Babuyan Islands, Cagayan, and Ilocos Norte.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning is in effect over the seaboard of Extreme Northern Luzon. Refer to Gale Warning No. 2 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- Up to 4.5 m: The seaboard of Batanes.
- Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.

Up to rough seas over the following coastal waters:

- Up to 4.0 m: The seabards of Babuyan Islands and Ilocos Norte.
- Up to 3.5 m: The seaboard of Ilocos Sur.
- Up to 3.0 m: The northern seaboard of mainland Cagayan; the western seaboard of Pangasinan.
- Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.

Up to moderate to rough seas over the following coastal waters:

- Up to 2.5 m: The seabards of Isabela, La Union, Zambales and Kalayaan Islands; the remaining seabards of Cagayan and Pangasinan; the northern and eastern seabards of Camarines Norte, Camarines Sur, Catanduanes, Northern Samar, and Eastern Samar.
- Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.

TROPICAL CYCLONE BULLETIN NR. 2

Tropical Depression SALOME

Issued at 2:00 PM, 22 October 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

TRACK AND INTENSITY OUTLOOK

- SALOME is forecast to move generally southwestward throughout the forecast period due to the High Pressure Area over mainland China. On the forecast track, SALOME may pass close or make landfall over Batanes tonight or tomorrow (23 October) early morning. This weather disturbance may also pass close or over Babuyan Islands by tomorrow morning, and in Ilocos Norte by tomorrow afternoon. SALOME may exit the Philippine Area of Responsibility on Friday (24 October) afternoon or evening.
- SALOME is likely to remain a tropical depression throughout the forecast period before weakening into a remnant low on Friday, but slight intensification into a tropical storm is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
