## TROPICAL CYCLONE BULLETIN NR. 2F

### Tropical Depression KIKO

Issued at 5:00 PM, 03 September 2025

#### OTHER HAZARDS AFFECTING LAND AREAS

KIKO is unlikely to directly affect the country throughout the forecast period.

#### HAZARDS AFFECTING COASTAL WATERS

KIKO is unlikely to affect the sea condition in the coastal waters of the country.

#### TRACK AND INTENSITY OUTLOOK

Tropical Depression KIKO will move generally north northwestward in the next 12 hours towards southern Japan. Due to favorable environmental conditions, KIKO is forecast to intensify into tropical storm tonight or tomorrow (04 September) early morning.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
