TROPICAL CYCLONE BULLETIN NR. 5

Tropical Depression HUANING

Issued at 5:00 AM, 19 August 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

- HUANING is forecast to move generally northward and exit the Philippine Area of Responsibility (PAR) this morning. On the track forecast, the tropical depression may pass near or over the Ryukyu Islands within the day.
- HUANING will likely remain as a tropical depression throughout the forecast period. Further intensification into a tropical storm is not ruled out but not the most likely scenario at this time.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
