

## TROPICAL CYCLONE BULLETIN NR. 2

### Tropical Depression PAOLO

Issued at 5:00 PM, 01 October 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

#### "PAOLO" SLIGHTLY INTENSIFIES WHILE MOVING WEST NORTHWESTWARD OVER THE PHILIPPINE SEA.

##### Location of Center (4:00 PM)

The center of Tropical Depression PAOLO was estimated based on all available data at **665 km East of Virac, Catanduanes (14.5°N, 130.3°E)**.

##### Intensity

Maximum sustained winds of **55 km/h** near the center, gustiness of up to **70 km/h**, and central pressure of **1002 hPa**

##### Present Movement

**West northwestward at 25 km/h**

##### Extent of Tropical Cyclone Winds

**Strong winds extend outwards up to 250 km from the center**

## TROPICAL CYCLONE BULLETIN NR. 2

### Tropical Depression PAOLO

Issued at 5:00 PM, 01 October 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
<b>1</b> Wind threat: <b>Strong winds</b>	<p><b>The northern portion of Catanduanes</b> (Pandan, Bagamanoc, Panganiban, Viga)</p> <p>Warning lead time: <b>36 hours</b>  Range of wind speeds: <b>39 to 61 km/h (Beaufort 6 to 7)</b>  Potential impacts of winds: <b>Minimal to minor threat to life and property</b></p>		

OTHER HAZARDS AFFECTING LAND AREAS			
<b>Heavy Rainfall Outlook</b>			
Refer to Weather Advisory No. 1 issued at 5:00 PM today for the heavy rainfall outlook due to Tropical Cyclone PAOLO.			
<b>Severe Winds</b>			
<p><b>The wind signals warn the public of the general wind threat</b> over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.</p> <ul style="list-style-type: none"> <li>Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.</li> </ul> <p><b>The highest Wind Signal that will likely be hoisted throughout its passage is Wind Signal No. 3. However, since the possibility of reaching typhoon category before landfall is not ruled out, the worst case scenario is Wind Signal No. 4.</b></p>			
<b>Coastal Inundation</b>			
<p>There is a <b>moderate to high risk of life-threatening storm surge</b> with peak heights reaching <b>1.0 to 2.0 m</b> within 48 hours over the low-lying or exposed coastal localities of Cagayan, Isabela, and Aurora. Refer to <b>Storm Surge Warning No. 1 issued at 2:00 PM today for the details.</b></p>			

HAZARDS AFFECTING COASTAL WATERS			
<b>24-Hour Sea Condition Outlook</b>			

Gale Warning may be raised over the seaboards of Northern and Central Luzon as early as tomorrow (02 October) afternoon in anticipation of rough to very rough sea conditions caused by the passage of PAOLO.

## TROPICAL CYCLONE BULLETIN NR. 2

### Tropical Depression PAOLO

Issued at 5:00 PM, 01 October 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

#### TRACK AND INTENSITY OUTLOOK

- It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.
- PAOLO is forecast to move generally westward to west northwestward for the entire forecast period. On the forecast track, **PAOLO may make landfall over Isabela or northern Aurora on Friday** (03 October) morning or afternoon. Further southward shift of track is possible depending on the strength of the high pressure area to the north of PAOLO. It will exit the Philippine Area of Responsibility by Saturday (04 October) morning.
- PAOLO will continue to intensify while over the Philippine Sea and may reach severe tropical storm category by Friday early morning. Further intensification into a Typhoon prior to landfall is not ruled out. Re-intensification is highly likely once PAOLO emerges over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
