

TROPICAL CYCLONE BULLETIN NR. 23

Typhoon TINO (KALMAEGI)

Issued at 5:00 PM, 05 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TYPHOON "TINO" FURTHER INTENSIFIES AS IT MOVES OVER THE WEST PHILIPPINE SEA EAST NORTHEAST OF KALAYAAN ISLANDS

Location of Center (4:00 PM)

The center of the eye of Typhoon TINO was estimated based on all available data at 330 km East Northeast of Pag-asa Island, Kalayaan, Palawan (12.2°N, 117.1°E).

Intensity

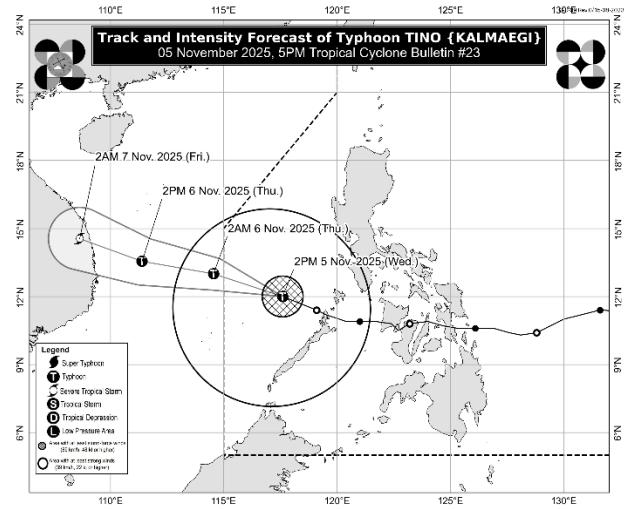

Maximum sustained winds of **140 km/h** near the center, gustiness of up to **170 km/h**, and central pressure of **970 hPa**

Present Movement

West northwestward at 30 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **560 km** from the center

PTRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 06 November 2025	13.0	114.6	220 km North of Pag-asa Island, Kalayaan, Palawan (OUTSIDE PAR)	155	TY	WNW 30
24-Hour Forecast 2:00 PM 06 November 2025	13.6	111.4	425 km Northwest of Pag-asa Island, Kalayaan, Palawan (OUTSIDE PAR)	150	TY	W 30
36-Hour Forecast 2:00 AM 07 November 2025	14.6	108.7	725 km West Northwest of Pag-asa Island, Kalayaan, Palawan (OUTSIDE PAR)	110	STS	WNW 25

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

TCWS No.	Luzon	Visayas	Mindanao
2 Wind threat: Gale-force winds	Kalayaan Islands	-	-
	Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property		
1 Wind threat: Strong winds	Occidental Mindoro including Lubang Islands and the rest of Palawan including Calamian and Cuyo Islands. Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property	-	-

TROPICAL CYCLONE BULLETIN NR. 23

Typhoon TINO (KALMAEGI)

Issued at 5:00 PM, 05 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 17 issued at 5:00 PM today for the heavy rainfall outlook due to TINO.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the localities where Wind Signal No. 2 is hoisted
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, the weakening surge of the Northeast Monsoon and the outer rainbands of TINO will also bring **strong wind gusts** over the following areas **not under Wind Signal** (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Babuyan Islands, Ilocos Norte, Zambales, Bataan, Batangas, Oriental Mindoro, Marinduque, Romblon, and Antique.

Coastal Flooding

There is a **minimal to moderate risk of storm surge** with peak heights reaching **1.0 to 2.0 m** within the next 24 hours over the low-lying or exposed coastal communities of Palawan. Refer to **Storm Surge Warning No. 13** issued at 2:00 PM today for more details.

TROPICAL CYCLONE BULLETIN NR. 23

Typhoon TINO (KALMAEGI)

Issued at 5:00 PM, 05 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seabards of Kalayaan Islands. For more information, refer to Gale Warning No. 7 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The seabards of Kalayaan Islands
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The western seabards of northern and central mainland Palawan.
- **Up to 3.5 m:** The remaining seabards of northern and central mainland Palawan.
- **Up to 3.0 m:** The seabards of Batanes, Babuyan Islands, Ilocos Norte, Ilocos Sur, Calamian Islands, Cuyo Islands Cagayancillo Islands, and Antique; the western seaboard of the rest of Palawan, and Aklan; the western and southern seabards of Occidental Mindoro including Lubang Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seabards of mainland Cagayan, Isabela, Zambales, Aurora, Camarines Norte, Zamboanga del Norte, and Surigao del Sur; the western seabards of Pangasinan, Bataan, Guimaras, and Negros Occidental; the southern seaboard of Iloilo; the western and southern seabards of Negros Oriental; the northern and eastern seabards of Catanduanes and Northern Samar; the northern seaboard of Camarines Sur; the eastern seaboard of Eastern Samar, Albay, and Sorsogon; the remaining seaboard of Palawan.
- **Up to 2.0 m:** The seabards of Ilocos Sur, La Union; the eastern and southern seabards of Oriental Mindoro; the western seabards of Romblon, Marinduque, Basilan, and Sulu; the eastern seabards of Dinagat Islands and Davao Oriental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

- **Heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to hoisted Wind Signals and the "Other Hazards affecting Land Areas" section for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- On the forecast track, TINO will continue moving west northwestward over the West Philippine Sea and exit the Philippine Area of Responsibility tonight or tomorrow (06 November) early morning.
- TINO is forecast to re-intensify in the next 12 hours and may reach its peak intensity while over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
