

TROPICAL CYCLONE BULLETIN NR. 11

Tropical Storm RAMIL (FENGSHEN)

Issued at 5:00 PM, 18 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

TROPICAL STORM RAMIL MAKES LANDFALL OVER GUBAT, SORSOGON	
Location of Center (4:00 PM)	
The center of Tropical Storm RAMIL was estimated based on all available data over the coastal waters of Gubat, Sorsogon (12.9°N, 124.2°E).	
Intensity	
Maximum sustained winds of 65 km/h near the center, gustiness of up to 90 km/h , and central pressure of 998 hPa	
Present Movement	
Westward slowly	
Extent of Tropical Cyclone Winds	
Strong to gale-force winds extend outwards up to 400 km from the center	
TRACK AND INTENSITY FORECAST 	

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 19 October 2025	14.7	122.5	Over the coastal waters of Jomalig, Quezon	TS	75	NW 25
24-Hour Forecast 2:00 PM 19 October 2025	16.4	120.3	Over the coastal waters of Aringay, Quezon	TS	75	NW 25
36-Hour Forecast 2:00 AM 20 October 2025	17.7	117.8	285 km West of Sinait, Ilocos Sur	TS	75	WNW 25
48-Hour Forecast 2:00 PM 20 October 2025	18.3	116.3	450 km West of Batac, Ilocos Norte (OUTSIDE PAR)	STS	95	WNW 15
60-Hour Forecast 2:00 AM 21 October 2025	18.6	115.0	585 km West of Laoag City, Ilocos Norte (OUTSIDE PAR)	STS	100	WNW 10
72-Hour Forecast 2:00 PM 21 October 2025	18.5	114.2	670 km West of Laoag City, Ilocos Norte (OUTSIDE PAR)	STS	110	W Slowly

TROPICAL CYCLONE BULLETIN NR. 11

Tropical Storm RAMIL (FENGSHEN)

Issued at 5:00 PM, 18 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 7 issued at 5:00 PM today for the heavy rainfall outlook due to RAMIL.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the localities where Wind Signal No. 2 is hoisted
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Although the most likely highest wind signal that will be hoisted is Wind Signal 2, the worst case scenario remains Wind Signal No. 3 due to the possibility of reaching severe tropical storm category before landfall.

Furthermore, the trough and outer rainbands of RAMIL and the easterlies will also bring **strong to gale-force gusts** over the following areas **not under Wind Signal** (especially in coastal and upland areas exposed to winds):

- **Today:** Cagayan Valley, CALABARZON, Metro Manila, Ilocos Norte, Ilocos Sur, Marinduque, Occidental Mindoro, Oriental Mindoro, Masbate, Caluya Islands, Samar, Eastern Samar, and Biliran
- **Tomorrow (19 October):** Central Luzon, Metro Manila, CALABARZON, Marinduque, Camarines Norte, Camarines Sur, and Catanduanes.

Coastal Inundation

There is a **minimal to moderate risk of storm surge** with peak heights of **1.0 to 2.0 m** within 36 hours over the low-lying or exposed coastal localities of Isabela, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Zambales, Aurora, Quezon, Marinduque, Bicol Region, Northern Samar, Eastern Samar, and Samar. Refer to **Storm Surge Warning No. 6 issued at 2:00 PM today for the details.**

TROPICAL CYCLONE BULLETIN NR. 11

Tropical Storm RAMIL (FENGSHEN)

Issued at 5:00 PM, 18 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning is in effect over the eastern seaboard of Southern Luzon. Refer to Gale Warning No. 2 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The seaboard of Isabela
- **Up to 4.5 m:** The seaboard of Camarines Norte; the northern seaboard of Camarines Sur; the northern and eastern seabards of Catanduanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The eastern seaboard of mainland Cagayan; the seaboard of the northern portion of Aurora.
- **Up to 3.5 m:** The seabards of Ilocos Norte and Ilocos Sur; the eastern seabards of Babuyan Islands, the northern portion of mainland Quezon, Albay, and Sorsogon; the northern and eastern seabards of Polillo Islands and Northern Samar.
- **Up to 3.0 m:** The seabards of Batanes; the remaining seabards of mainland Cagayan and Babuyan Islands;
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboard of La Union; the western seaboard of Pangasinan; the eastern seaboard of Eastern Samar and the rest of Quezon.
- **Up to 2.0 m:** The seaboard of Marinduque; the eastern seabards of Dinagat Islands; the western seaboard of Northern Samar; remaining seabards of Bicol Region and Quezon.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 11

Tropical Storm RAMIL (FENGSHEN)

Issued at 5:00 PM, 18 October 2025

Valid for broadcast until the next bulletin at 8:00 PM today.

TRACK AND INTENSITY OUTLOOK

- It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.
- On the forecast track, RAMIL then will continue moving west northwestward over the landmass or coastal waters of Bicol Region between this afternoon and tomorrow (19 October) early morning. Afterwards, it will pass close or over Polillo Islands tomorrow morning, then make a final landfall in the vicinity of Aurora tomorrow (19 October) morning or afternoon. The possibility of landfall over northern Quezon or southern Isabela instead of Aurora is also not ruled out based on the forecast confidence cone.
- After making landfall in Aurora, RAMIL will traverse the mountainous terrain of Northern Luzon and emerge over the coastal waters of Pangasinan or La Union tomorrow evening. It will exit the Philippine Area of Responsibility on Monday (20 October) morning.
- Due to its proximity to the sea and the absence of large mountain ranges in Bicol Region, a re-intensification scenario before the final landfall in Aurora within the next 24 hours is likely. During its passage over Northern Luzon, RAMIL may maintain its strength or slightly weaken due to frictional effects of the mountainous landmass. Once over the West Philippine Sea, further re-intensification is highly likely.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 PM today.
