

TROPICAL CYCLONE ADVISORY NR. 5A

Tropical Storm FUNG-WONG

Issued at 5:00 AM, 06 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

**THE TROPICAL DEPRESSION OUTSIDE THE PHILIPPINE AREA OF RESPONSIBILITY
INTENSIFIED INTO TROPICAL STORM FUNG-WONG.**

The figure is a map of the Western North Pacific Ocean showing the projected track and intensity of Tropical Storm FUNG-WONG. The map spans from 115°E to 150°E longitude and 5°N to 25°N latitude. A shaded area indicates the storm's path, starting near the Philippines and moving northwest towards the East China Sea. A large circle on the right side of the map represents the 500 km radius of gale-force winds. The map includes a legend for tropical cyclone symbols and a timeline from 6 November 2025, 5AM to 10 November 2025, 2AM.

Location of Center (4:00 AM)

The center of Tropical Storm FUNG-WONG was estimated based on all available data at **1,715 km East of Northeastern Mindanao (OUTSIDE PAR) (9.7°N, 141.1°E)**.

Intensity

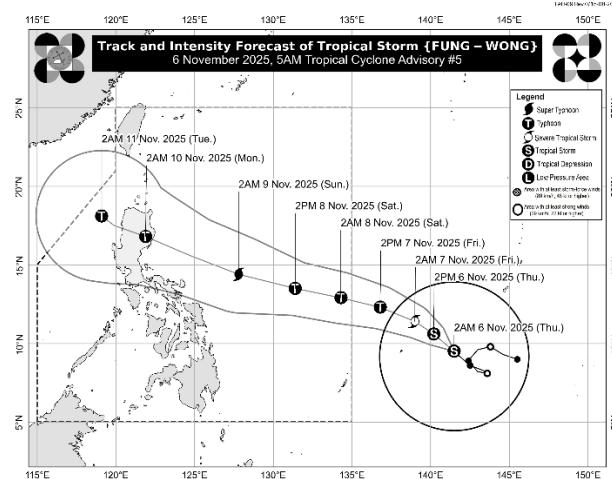

Maximum sustained winds of **65 km/h** near the center, gustiness of up to **80 km/h**, and central pressure of **998 hPa**.

Present Movement

Northwestward at 20 km/h

Extent of Tropical Cyclone Winds

Strong to gale-force winds extend outwards up to 550 km from the center

TRACK AND INTENSITY FORECAST

| TRACK AND INTENSITY FORECAST | | | | | | | |
|---|-----------------|-----------|---|--|------------|------|--------------------------------|
| Date and Time | Center Position | | | | Intensity | | Movement dir. and speed (km/h) |
| | Lat. (°N) | Lon. (°E) | Location | | MSW (km/h) | Cat. | |
| 12-Hour Forecast 2:00 PM 06 November 2025 | 10.6 | 140.2 | 1,580 km East of Eastern Visayas (OUTSIDE PAR) | | 85 | TS | NW 15 |
| 24-Hour Forecast 2:00 AM 07 November 2025 | 11.4 | 139.0 | 1,445 km East of Eastern Visayas (OUTSIDE PAR) | | 100 | STS | NW 15 |
| 36-Hour Forecast 2:00 PM 07 November 2025 | 12.3 | 136.8 | 1,325 km East of Eastern Visayas (OUTSIDE PAR) | | 120 | TY | WNW 20 |
| 48-Hour Forecast 2:00 AM 08 November 2025 | 12.9 | 134.3 | 1,145 km East of Southeastern Luzon | | 150 | TY | WNW 25 |
| 60-Hour Forecast 2:00 PM 08 November 2025 | 13.5 | 131.4 | 780 km East of Virac, Catanduanes | | 165 | TY | WNW 25 |
| 72-Hour Forecast 2:00 AM 09 November 2025 | 14.4 | 127.8 | 660 km East of Infanta, Quezon | | 195 | STY | WNW 35 |

TROPICAL CYCLONE ADVISORY NR. 5A

Tropical Storm FUNG-WONG

Issued at 5:00 AM, 06 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- This tropical cyclone (TC) will continue moving northwestward until tomorrow (07 November) then turn west northwestward for the remainder of the forecast period. On the track forecast, this TC is forecast to enter the PAR tomorrow late evening or Saturday (08 November) early morning. Once inside the PAR, the domestic name "UWAN" will be assigned to this TC.
- Although the uncertainty in track and intensity forecast is typically high for day-4 and day-5 forecasts, there is an increasing chance of landfall on Monday (10 November) over Northern or Central Luzon.
- In terms of intensity, **this TC is forecast to rapidly intensify** and may reach typhoon category tomorrow and super typhoon category on Saturday. **It may also make landfall at or near its peak lifetime intensity.**
- For land hazards:** **Wind Signals** may be hoisted over the eastern portion of Luzon and portions of Samar Provinces as early as tomorrow evening or Saturday morning in anticipation of strong winds or higher associated with the upcoming TC. The highest possible Wind Signal for the current forecast scenario is Wind Signal No. 5. Deterioration of weather condition may begin on Sunday (09 November). Potentially life-threatening stormy conditions may occur over Northern Luzon and portions of Central Luzon on Monday (10 November) and Tuesday (11 November). There is also a potential for high storm surge risk and related coastal flooding, especially in Northern Luzon and the east coast of Central Luzon. Storm surge warnings may be issued as early as Saturday.
- For marine hazards:** **Moderate to rough seas** may begin over the northern and eastern seaboard of Luzon and the eastern seabards of Visayas and Mindanao tomorrow or on Saturday, western and southern seabards of Luzon may reach moderate to rough sea condition by mid Saturday or on Sunday. **Hazardous sea conditions (reaching very rough, high, very high, or phenomenal seas)** may affect most of Luzon and the eastern seabards of Southern Luzon and Visayas from Sunday onwards. Gale Warning for very rough seas in coastal waters will likely be issued on Saturday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless there is an intermediate issuance, the next tropical cyclone advisory will be issued at 11:00 AM today.
