## TROPICAL CYCLONE BULLETIN NR. 6F

### Tropical Depression HUANING

Issued at 11:00 AM, 19 August 2025

#### TRACK AND INTENSITY OUTLOOK

- HUANING exited the Philippine Area of Responsibility at 5:00 AM today. It is forecast to move north northwestward and may make landfall over Ryukyu Islands today.
- HUANING will likely remain as a tropical depression throughout the forecast period. Further intensification into a tropical storm is not ruled out but not the most likely scenario at this time.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

With this development and unless re-entry occurs, this is the final tropical cyclone bulletin. Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast issued at 4:00 AM and 4:00 PM daily.
